REASONS FOR ALLOWANCE

1. Claims 1-7 and 14-17 are allowed over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

The invention as claimed, specifically in combination with a photoelectric conversion element having a photosensitive *thin-film transistor* and a *capacitor connected to a drain electrode* of the photosensitive thin-film transistor, with control means for *reversing the polarity of the stored charge in the capacitor* with respect to a *potential of a source electrode* of the photosensitive thin-film transistor, is not disclosed or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Young et al. US Patent No. 6,738,031 teaches an image reading device with a photoelectric conversion element having a photosensitive thin-film transistor and a capacitor connected to a train electrode of the photosensitive thin-film transistor but does not teach control means for reversing the polarity of the stored charge in the capacitor with respect to a potential of a source electrode of the photosensitive thin-film transistor.
